

# PRESS RELEASE

## FOR IMMEDIATE RELEASE

March 15, 2016

### **Naprotek Inc. receives top recognition for excellence.**

LAS VEGAS, NV - Circuits Assembly announced the winners of the 2016 Service Excellence Awards (SEAs) for electronic manufacturing services (EMS) providers. Circuits Assembly recognizes companies that received the highest customer service rating, as judged by their own customers.

Naprotek received highest overall rating and the Award in four categories: Manufacturing Quality, Responsiveness, Dependability / Timely Delivery, and Value.

### **Here are some of the comments from the customers who were surveyed:**

"Naprotek consistently met or exceeded their delivery commitments. We are very satisfied with their delivery performance."

"The main reason I continue to send my board assemblies, especially new and more complicated designs, is I have found I can depend on them 100% to get things right the first time."

"Many of my jobs are rush projects, they have done an excellent job supporting me from prototype development through production."

"Early in our production run we were still developing our products with numerous engineering design changes. Naprotek was quite nimble responding to our changes."

### **About Naprotek**

*Founded in 1995, Naprotek, Inc. is a woman owned and managed Silicon Valley based electronics manufacturing services (EMS) provider specializing in prototypes and low to medium volume manufacturing. Its business base includes companies in military/aerospace, satellites, semiconductor manufacturing, medical, industrial, networking, R&D and consumer products. Naprotek is AS9100 C, ISO 13485:2003 and ISO 9001:2008 certified, and ITAR registered.*
